WORK EXPERIENCE

Chicmic

Jan 2025 - June 2025

Software Engineer Intern

Punjab, Mohali

- Developing immersive game mechanics using C++ scripting in Unreal Engine.
- Collaborating with cross-functional teams to optimize game performance and implement real-time physics simulations.
- Troubleshooting and debugging complex game play systems using analytical problem-solving methodologies.

CodingGita

Dec 2023 - Jan 2024

Full-stack Intern

Remote

- Engineered scalable web applications using React.js, Node.js, and RESTful APIs, improving user engagement by 30% .
- Architected database schemas (MongoDB/MySQL) for optimized data retrieval and storage efficiency.
- Spearheaded CI/CD pipelines using Git, reducing deployment time by 20% .
- Resolved critical bugs through systematic root-cause analysis, enhancing application stability.

Projects

Real-Time Chat System | Go

June 2025 - July 2025

- Architected and developed a scalable real-time chat application using Go, implementing Clean Architecture principles with WebSocket support for real-time messaging, featuring direct messages, group chats, and broadcast channels with concurrent user management and authentication system featuring JWT-based authentication with role-based access control
- Engineered high-performance WebSocket infrastructure using custom hub pattern and Redis caching, achieving 75% faster response times through efficient caching strategies
- Designed optimized MongoDB data models with strategic denormalization and efficient querying patterns, reducing database lookups by 60% through embedded data structures and intelligent caching with Redis (5-minute TTL)
- Built advanced real-time features including typing indicators, read receipts, message reactions, and user presence tracking, while maintaining thread-safe operations and automatic cleanup of inactive connections

2D Platformer Game Development in Java | Java

Feb 2021 - March 2023

- Devised object-oriented systems for character physics (gravity, collision) and health management.
- Leveraged multithreading to optimize sprite animation rendering and gameplay fluidity.
- Animation Handling : Animated sprite animations loaded and managed for various actions, ensuring seamless transitions.
- Object-Oriented Design : Applied OOP principles for maintainable and reusable code.

Education

Lovely Professional University Punjab

2021 – 2025

Computer Science and Engineering — CGPA: 7.8

Jalandhar, Punjab

Army Public School, Nehru Road, Lucknow

2018 – 2019

12th with Science — Percentage: 76.60%

Lucknow, Uttar Pradesh

Technical Skills

Languages: Golang ,C/C++ ,Java, Python ,JavaScript.

Technologies/Frameworks: Gin, Node.js, React, Angular ,Bootstrap, Tailwind.

Developer Tools: VS Code, Eclipse, Unity, Unreal Engine ,Cursor ,informatica PowerCenter.

Database: MySQL, MongoDB ,PostgreSQL.

Achievements

- **Codeforces Pupil (Max 1346)** Among 21k+ participants in Codeforces Round 955 - Div. 2.
- **3 Stars @CodeChef (Max 1706)** Among 2k+ participants in Starters Round 141 - Div. 2.
- **Top-5 in Master Competitive Programming** Complete Beginner to Advance 1836 in GeeksForGeeks.
- **E-Certificate of Short-Term Course** Desktop Application Development using JAVA.
- **Solved over 416+ questions on LeetCode** Attaining a contest rating of 1481.
- **Online Summer Training Course** On Solving Competitive Problems using Data Structures.
- **COD-A-FESTx Participation Certificate** Participated in the coding fest.
- **Quiz: Challenging Future Programmers 2022** Successfully participated in a programming quiz competition.
